

1. I should believe that I have hands.
2. I cannot rule out a situation in which all of my experiences of hands are hallucinations, and in which I have no hands.

C. Sometimes I should believe P, even if I cannot rule out a situation which would make P false. (1,2)

THE MOOREAN ANTI-SKEPTICAL ARGUMENT

AN ARGUMENT FOR SKEPTICISM ABOUT HANDS

Both arguments can't be sound. If the conclusion of the skeptical argument is true, then (1) of the Moorean argument is false. If the conclusion of the Moorean argument is true, (2) of the skeptical argument is false.

So we have to choose.

1. There are situations which I cannot rule out which would make beliefs formed on the basis of sense experience false.
2. If you cannot rule out a situation which would make P false, you should not believe P.
(Doubt $\rightarrow$ No Belief)
3. You should not form beliefs on the basis of sense experience.
(1,2)
4. Sense experience is your only source of information about hands.

C. You should not form any beliefs about hands. (3,4
