

1. We have no choice about past facts.
2. In the past, God had foreknowledge of our future actions.
3. We have no choice about the fact that God knows that in the future I will perform a certain action. (1,2)
4. If we have no choice about some facts, and those facts necessitate X, we have no choice about X.
5. God knowing that we will perform some action necessitates that we will perform that action.

-----

- C. We have no choice about whether we will perform our future actions. (3,4,5)

# THE FOREKNOWLEDGE ARGUMENT

1. We have no choice about past facts.
  - 2\*. In the past, there were truths about all of our future actions.
  3. We have no choice about the fact that God knows that in the future I will perform a certain action. (1,2)
  4. If we have no choice about p, and no choice about the fact that if p, then q, then we have no choice about q.
  - 5\*. We have no choice about the fact that if it is true that I will perform some action, then I will perform that action.
- 

C. We have no choice about whether we will perform our future actions.  
(3,4,5)

The fatalist argument

Now that we have this  
argument on the table,  
notice that it can be  
improved in one respect.

Premise (1) is more broad than it needs to be. We don't need to assume that we have no choice about **any** past fact; we just need to assume that we have no choice now about what God knew in the past.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in financial reporting.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the experimental procedures and the statistical analysis performed.

3. The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings of the research. The data shows a clear trend of increasing activity over time.

4. The fourth part of the document discusses the implications of the findings. It highlights the potential applications of the research in various fields and the need for further investigation in this area.

5. The fifth part of the document concludes the study. It summarizes the key findings and provides a final statement on the importance of the research. The authors express their gratitude to the funding agency and the participants.

6. The sixth part of the document includes a list of references and a list of figures. The references cite the works of other researchers in the field, and the figures provide a visual representation of the data.

7. The seventh part of the document includes a list of tables and a list of equations. The tables provide a detailed breakdown of the data, and the equations represent the mathematical models used in the study.

8. The eighth part of the document includes a list of appendices and a list of footnotes. The appendices provide additional information and data, and the footnotes provide clarification on certain points.
