

1. We have no choice about what God knew in the past.
2. In the past, God had foreknowledge of our future actions.
3. We have no choice about the fact that God knows that in the future I will perform a certain action. (1,2)
4. If we have no choice about some facts, and those facts necessitate X, we have no choice about X.
5. God knowing that we will perform some action necessitates that we will perform that action.

- C. We have no choice about whether we will perform our future actions. (3,4,5)

THE FOREKNOWLEDGE ARGUMENT

1. We have no choice about past facts.
 - 2*. In the past, there were truths about all of our future actions.
 3. We have no choice about the fact that God knows that in the future I will perform a certain action. (1,2)
 4. If we have no choice about p, and no choice about the fact that if p, then q, then we have no choice about q.
 - 5*. We have no choice about the fact that if it is true that I will perform some action, then I will perform that action.
-

C. We have no choice about whether we will perform our future actions.
(3,4,5)

The fatalist argument

We'll soon consider some possible responses to Edwards' argument.

But before we do that, let's ask: can we come up with an argument similar to the Foreknowledge Argument which is based, not on foreknowledge, but on fate?

Wecan.

all of our activities.

God knows that in the future I will

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities related to the project.

2. It then outlines the various methods used to collect and analyze data, including interviews, surveys, and focus groups.

3. The next section describes the results of the data collection and analysis, highlighting the key findings and trends.

4. This is followed by a discussion of the implications of the findings for the project and the organization as a whole.

5. The final section provides a summary of the overall findings and conclusions, along with recommendations for future research and action.

6. The document concludes with a list of references and a bibliography, providing a comprehensive overview of the sources used in the research.

7. The entire document is presented in a clear, concise, and professional manner, ensuring that the information is easily accessible and understandable to all stakeholders.

8. The document is a valuable resource for anyone involved in the project, providing a detailed and thorough overview of the research findings and conclusions.

We'll soon consider some

possible responses to Edwards'

argument.

For knowledge Argument which

but on fate?

But before we do that, let's

ask: can we come up with an

argument similar to the

is based, not on foreknowledge,

So now consider a possible scenario in which someone exactly like you would get

never had any. So they lacked free will before getting a Predicto.

a Predictor. By the above line of thought, this person would lack free will. But

that Predict did not **take away** their free will; it just shows them that they

either.

But this person was stipulated to be exactly like you. So you don't have free will,

So far we've looked at two imaginary thought experiments—the story of Osmo,

and the example of the Predictor — which seem to show that if there is such a

things as fate, then there is no free will.

Our question is: do either fatigue or foreknowledge pose a

serious challenge to the reality of free will?

actions. Could they give an argument

there were truths about all our future

Edwards' argument — but did believe that

God— and hence rejected premise (2) of

similar to Edwards' argument?

Suppose that someone did not believe in

with reference to the being of truth about

our future actions.

God only shows up in premises (2) and

(5) Let's look at what happens if we

replace reference to God's foreknowledge

1. We have no choice about past facts.
 - 2*. In the past, there were truths about all of our future actions.
 3. We have no choice about the fact that God knows that in the future I will perform a certain action. (1,2)
 4. If we have no choice about p, and no choice about the fact that if p, then q, then we have no choice about q.
 - 5*. We have no choice about the fact that if it is true that I will perform some action, then I will perform that action.
-

C. We have no choice about whether we will perform our future actions.
(3,4,5)

The fatalist argument

THE FOREKNOWLEDGE ARGUMENT

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation 2000).

There is a growing awareness of the need to address the needs of people with mental health problems, and the importance of providing them with appropriate services. However, there is a significant gap between the current needs of people with mental health problems and the services available to them. This gap is due to a number of factors, including a lack of resources, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public. This paper will discuss the current needs of people with mental health problems, and the services available to them. It will also discuss the factors that contribute to the gap between the current needs of people with mental health problems and the services available to them.

The first factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of resources. There is a significant shortage of mental health professionals, and the services available to people with mental health problems are often limited. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.

The second factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of training for health professionals. Many health professionals do not have the necessary training to provide appropriate services to people with mental health problems. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.

The third factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of understanding of mental health problems by the general public. Many people do not understand what it is like to have a mental health problem, and they often have negative attitudes towards people with mental health problems. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.

In order to address the needs of people with mental health problems, it is essential to provide them with appropriate services. This requires a number of things, including a sufficient number of mental health professionals, appropriate training for health professionals, and a better understanding of mental health problems by the general public. This paper will discuss the current needs of people with mental health problems, and the services available to them. It will also discuss the factors that contribute to the gap between the current needs of people with mental health problems and the services available to them.

The first factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of resources. There is a significant shortage of mental health professionals, and the services available to people with mental health problems are often limited. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.

The second factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of training for health professionals. Many health professionals do not have the necessary training to provide appropriate services to people with mental health problems. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.

The third factor contributing to the gap between the current needs of people with mental health problems and the services available to them is a lack of understanding of mental health problems by the general public. Many people do not understand what it is like to have a mental health problem, and they often have negative attitudes towards people with mental health problems. This is due to a number of factors, including a lack of funding, a lack of training for health professionals, and a lack of understanding of mental health problems by the general public.
