

Premises 1 and 2 of Edwards' argument
imply a further claim about the status of
God's foreknowledge of our actions.

1. We have no choice about
past facts.

2. In the past, God had foreknowledge of our future actions.

3. We have no choice about God's knowing that in the future I will perform a certain action. (1,2)

“1. I observed before, in explaining the nature of necessity, that in things which are past, their past existence is now necessary: having already made sure of existence, it is too late for any possibility of alteration in that respect ... ”

“2. If there be any such thing as a divine foreknowledge of the volitions of free agents, that foreknowledge ... is a thing which already has, and long ago had, existence; and so, now its existence is necessary.”

some action, then I will prefer that

0 We have achieved what we

will perform various actions.

perform a certain action (1,2)

then we have the choice about q.

choice about the fact that if p , then q ,

(3, 4, 5)

5* We have noticed that the fact

The fatalist argument

freedom that comes from fate.

Our first topic today is the oldest challenge to the existence of free will: the challenge to

a Predictor. By the above line of thought, this person would lack free will. But

that Predict did not **take away** their free will; it just shows them that they

never had any. So they lacked free will before getting a Predict.

So now consider a possible scenario in which someone exactly like you would get

either.

But this person was stipulated to be exactly like you. So you don't have free will,

things as fate, then there is no free will.

So far we've looked at two imaginary thought experiments—the story of Osmo,

and the example of the Predictor — which seem to show that if there is such a

serious challenge to the reality of free will?

Our question is: do either fatigue or foreknowledge pose a
