need estimates $\hat{X}$, we have no

THE FATALIST ARGUMENT

So now consider a possible scenario in which someone exactly like you would get

that Predict did not **take away** their free will; it just shows them that they

a Predictor. By the above line of thought, this person would lack free will. But

never had any. So they lacked free will before getting a Predicto.

But this person was stipulated to be exactly like you. So you don't have free will,

either.

So far we've looked at two imaginary thought experiments—the story of Osmo,

and the example of the Predictor — which seem to show that if there is such a

things as fate, then there is no free will.

Our question is: do either fatigue or foreknowledge pose a

serious challenge to the reality of free will?

freedom that comes from fate.

Our first topic today is the oldest challenge to the existence of free will: the challenge to

responding to Edwards' argument. But

for fatalsn.

We'll shortly consider some ways of

argument might be related to an argument

first let's think about how Edwards'

actions. Could they give an argument

Edwards' argument — but did believe that

similar to Edwards' argument?

Suppose that someone did not believe in

God— and hence rejected premise (2) of

there were truths about all our future

replace reference to God's foreknowledge

God only shows up in premises (2) and

our future actions.

(5) Let's look at what happens if we

with reference to the being of truth about

perform a certain action (1,2)

3 We have not the fact that

then we have the choice about q.

that if it is true that I will perform

choice about the fact that if p , then q ,

2*In the past, there were truths about

4. If we have no choice about p , and no
