

Questions about what you are are closely related to questions about **survival**. We can introduce the kinds of questions about survival we will be focusing on with an example.

Suppose that in the year 2070 the surviving members of this Introduction to Philosophy class decided to have an Intro to Philosophy reunion, and all gathered in this room. Suppose that they decided to get a group picture taken.

Now imagine that, via some sort of time travel device, I now have that photo, and show it to you. You might ask: Am I one of those people? Which one am I?

It is very natural to assume that these questions must have determinate answers. There must be some fact of the matter about whether one of the people in the photo is you. And, if one is you, there must be some fact of the matter about which one is you.

Let's suppose that this is true: there must be a fact about whether you survive to be
in this picture, and must be a fact about which of the survivors you are.

Questions about what you are closely related to questions about survival. We can

introduce the kinds of questions about survival we will be focusing on with an example

Support that in the year 2070 the surviving members of this Introduction to

this room. Suppose that they decide to get a group picture taken.

Philosophy decided to have an Intro to Philosophy reunion, and all gathered in

Today we turn to our third big question. This question can be introduced by an

example.

Philosophy class decided to have an Intro to Philosophy reunion, and all gathered in

this room. Suppose that they decided to get a group picture taken.

Suppose that in the year 2069 the surviving members of this Introduction to

Now imagine that, via some sort of time travel device, I have that photo, and

show it to you. You might ask: And one of those people? Which one?

There must be some fact of the matter about whether or not the people in the photo

you.

It is very natural to assume that these questions must have determinate answers.

is you. And, if one is you, there must be some fact about one which

in this picture, and must be a fact about which of the survivors you are

Let's suppose that this is true: there must be a fact about whether you survive to be

Now imagine that, via some sort of time travel device, I have that photo, and

show it to you. You might ask: Am I one of those people? Which one am I?

There must be some fact of the matter about whether or not the people in the photo

you.

But is every natural assumption that these questions must have determined answers?

is you. And, if one is you, there must be some fact about which one is

in this picture, and must be a fact about which of the survivors you are.

Let's suppose that this is true: there must be a fact about whether you survive to
