

But what are the relevant psychological relations?

Locke's answer was: relations of memory.

memory

**materialist
survival**

A solid red circle with a subtle drop shadow, centered on a white background. Inside the circle, the words "soul" and "survival" are written in a white, bold, sans-serif font, stacked vertically.

**soul
survival**

Of course there are plenty of other psychological connections between people at one time and those people at a later time. Different versions of the psychological theory of survival focus on different sorts of psychological connections.

But let's stick with Locke's theory for now. Let's call this the **memory theory** of survival.
