

Let's turn now to the case **against** immaterial souls. We're going to talk about two types of arguments. The first is an argument against any view which says that phenomenal properties are not physical properties. It begins with a question:

One answer is: Yes.

Physical properties can
cause phenomenal
properties, **and**

phenomenal properties can
cause physical properties.

Are there causal interactions between physical
and phenomenal properties?

A second answer is: Yes.

Physical properties can
cause phenomenal
properties; **but** phenomenal
properties cannot cause
physical properties.

A third answer is: No.
Physical and phenomenal
properties cannot causally
interact.

interactionism
