

But this seems to show that phenomenal
properties are not physical properties.

Here is one way in which the argument, which is sometimes called the **knowledge argument**, can be laid out.

If a situation is
conceivable, it is
possible.

It is conceivable that
two beings be
physically the same
but differ with
respect to their
phenomenal properties.

It is possible that
two beings be
physically the same
but differ with
respect to their
phenomenal
properties.

Phenomenal
properties are not
physical
properties.

If we are wholly
physical things,
then phenomenal
properties are
physical
properties.

We are not wholly
physical things.

If we are not
wholly physical
things then
immaterial souls
exist.

Immaterial souls
exist.
