

the basic
argument

**allowable
evils**

A large, solid orange circle serves as the background for the text.

what is
omnipotence?

the
argument
reformulated

This argument simply replaces (5) with (5^*) . But this argument is invalid. To fix it, we need to make some changes to the premises which are supposed to follow from (5^*) .

1. If God exists, then God is omnipotent.
2. If something is omnipotent, it can do anything.
3. If God exists, then God can do anything. (1,2)
4. If God exists, then God is wholly good.
- 5*. If something is wholly good, it always eliminates as much pointless evil as it can.
6. If God exists, then God eliminates as much pointless evil as God can. (4,5)
7. If God exists, then God eliminates all pointless evil. (3,6)
8. If God exists, then there is no pointless evil. (7)
- 9*. Some pointless evil exists.

C. God does not exist. (8,9)

THE ARGUMENT FROM POINTLESS EVIL

But this is not quite enough; the argument is still invalid, since the conclusion does not follow from (8) and (9).

To fix this, we need to strengthen
premise (9).

Let's call this the 'argument from
pointless evil.'

Once again the believer in God must find an independent premise to reject; and it looks much harder to reject (5*) than it was to reject (5).

But now it might look more promising to reject (9^*) .

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study, and the fourth part discusses the conclusions and implications of the findings. The paper concludes with a summary of the key points and a list of references.

The research was conducted using a quantitative approach, with data collected from a survey of 100 participants. The data was analyzed using statistical software, and the results were presented in a series of tables and graphs. The findings of the study indicate that there is a significant relationship between the variables being studied, and that the results have important implications for the field of research.

The study was limited by a number of factors, including the sample size and the potential for bias. However, the results of the study are consistent with the findings of other research in the field, and the study provides valuable insights into the topic being studied.

The research was funded by the National Science Foundation, and the results of the study are being made available to the public through a series of reports and publications. The study is a significant contribution to the field of research, and the findings have important implications for the future of the field.
