

Last time we introduced the question of what we should believe. We began by considering this rule of belief:

No Proof $\rightarrow$ No Belief

If you can't give a good
argument for P, don't
believe P.

But we saw that this led to the result that you should not believe anything at all, which seems very implausible.

At the very least, it seems, we should believe things that we can be certain of:

Certainty $\rightarrow$ Belief

If you can rule out any situation which would make P false, you should believe P.

Experience → Belief

If your sense experience tells you that P, and you have no reason to think that your sense experience is misleading, you should believe P.

Proof $\rightarrow$ Belief

If you can prove
P, you should
believe P.

This is a version of a view known as foundationalism.

It can be summed up with the following negative rule of belief:

No Foundations → No Belief

If you can't be certain that P and your senses don't tell you that P and you can't give a good argument for P, you should not believe P.

We can now put that second argument in a more precise form.

1. We have no sensory experience of God.
2. You can't be certain that God exists.
3. We have no good argument for the existence of God.
4. If you can't be certain that P and your senses don't tell you that P and you don't have a good argument for P, you should not believe P.

C. You should not believe in God. (1,2,3,4)

THE EVIDENTIALIST ARGUMENT AGAINST BELIEF IN GOD

Last time we introduced the question of what we should believe. We began by

considering this rule of belief:

No Proof $\rightarrow$ No Belief

If you can't give a good
argument for P, don't
believe P.

But we saw that this led to the result that you should not believe anything at

all, which seems very implausible.

Certainty $\rightarrow$ Belief

If you can rule out any situation which would make P false, you should believe P .

Experience → Belief

If your sense experience tells you that P, and you have no reason to think that your sense experience is misleading, you should believe P.

Proof $\rightarrow$ Belief

If you can prove
P, you should
believe P.

No Foundations → No Belief

If you can't be certain that P and
your senses don't tell you that P
and you can't give a good
argument for P, you should not
believe P.

1. We have no sensory experience of God.
2. You can't be certain that God exists.
3. We have no good argument for the existence of God.
4. If you can't be certain that P and your senses don't tell you that P and you don't have a good argument for P, you should not believe P.

C. You should not believe in God. (1,2,3,4)

THE EVIDENTIALIST ARGUMENT AGAINST BELIEF IN GOD

for nm.

We can now put that second argument in a more precise

1. We have no sensory experience of God.
2. You can't be certain that God exists.
3. We have no good argument for the existence of God.
4. If you can't be certain that P and your senses don't tell you that P and you don't have a good argument for P, you should not believe P.

C. You should not believe in God. (1,2,3,4)
