

free will
and
determinism

A large orange circle with a subtle drop shadow, containing the text "against compatibilist free will" in white, bold, sans-serif font.

**against
compatibilist
free will**

against
incompatibilist
free will

The conclusion of the consequence argument says that if determinism is true, there are no free actions. So the truth of determinism is **incompatible** with the existence of free actions.

This conclusion is reached on the basis of just three key assumptions:

No one has any
choice about the
state of the world in
the distant past.

No one has any
choice about what
the laws of nature
are.

If we have no choice
about some facts,
and those facts
necessitate X , we
have no choice
about X .

I want now to look at one way in which a compatibilist might respond to this argument, and this is to focus on the last of these assumptions.
