

free will
and
determinism

A large orange circle with a subtle drop shadow, containing the text 'against compatibilist free will' in white, bold, sans-serif font.

**against
compatibilist
free will**

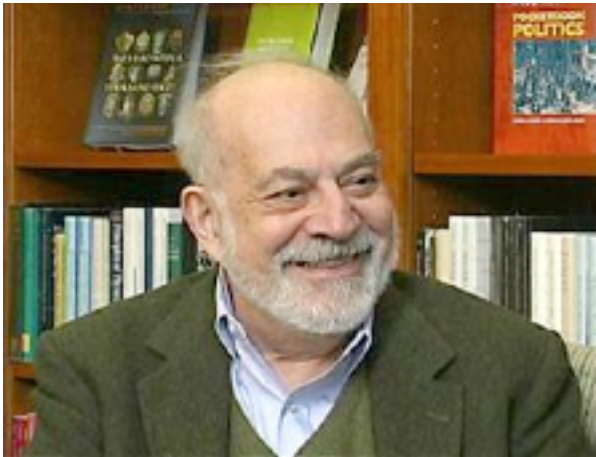

against
incompatibilist
free will

If we have no choice
about some facts,
and those facts
necessitate X , we
have no choice
about X .

I want now to look at one way in which a compatibilist might respond to this argument, and this is to focus on the last of these assumptions.

As we saw last time, is not hard to come up with examples which make the No
Choice/Necessitation principle seem plausible.

So the Principle has much to be said for it. But it has also been challenged. Some of the most important challenges to it are due to the contemporary philosopher Harry Frankfurt.
